OEM CUSTOMIZATION CASE

Airless sprayer private-label project

A real customer-customized airless paint sprayer project identified by DUPOW as DUP-AS-001. The confirmed scope connects product appearance, labeling, instructions and retail/export packaging. Customer identity and order references are withheld.

Customer-selected color	The customer requested an order-specific color for the product housing.
Customized labels	Customer-defined product labels and branding for the order.
Instructions / manual	Customer-customized instructions supplied with the project.
Packaging	Customer-defined packaging presentation and order-specific packing requirements.

Actual photograph from the source inspection report showing the order housing and control area. This selected frame does not display the customer brand label.

Inspection connection: The source report contains 92 embedded images and records checks of appearance, color and labels, accessories and packaging, alongside operating and electrical measurements. This OEM summary focuses on the customization scope; the inspection documentation is reviewed separately.

Order-specific configuration: Product appearance, labels, accessories, electrical version, manual and packaging are confirmed for the exact order. This customized project does not replace the standard catalogue specification or establish document applicability for other markets.

Source boundary: Customer requirements were confirmed by DUPOW and linked to the supplied inspection report. No design-revision count, customer approval date, sales result or shipment outcome is added. The public image is a whole-frame delivery copy without source photo metadata.
