

REPRESENTATIVE PRE-SHIPMENT EVIDENCE

Electric Blower Vacuum Inspection Record

Public summary - source inspection date: 7 September 2026

Public-release boundary

Customer, order, external-brand, source-model, supplier, factory, component-maker and personnel identifiers have been removed. The result applies only to the recorded 500-unit batch and 20-unit sample; it is not a product certification.

Record overview

Website reference	DUP-BV-001	Product	Electric leaf blower / vacuum
Inspection linkage	Verified internally to DUP-BV-001	Inspection date	7 September 2026
Order quantity	500 units	Sample quantity	20 units

Source result	PASS	Public status	Summary of one inspected batch

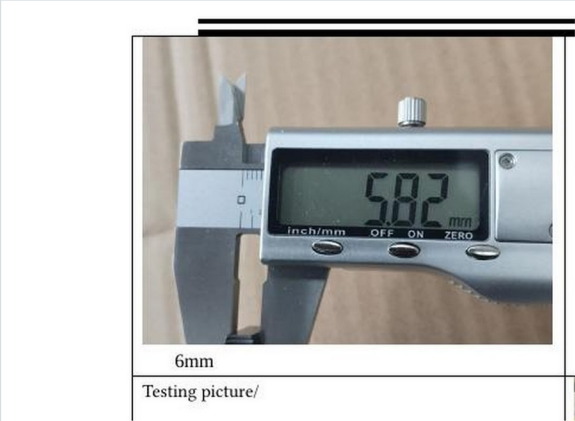

Recorded checks

- Packaging, accessories, appearance and assembly checks.
- Blower, vacuum, shredding, bag, tube, controls and practical debris tests.
- No-load run, abnormal stone-suction, air-speed and noise checks.
- Dielectric-strength test recorded at 3,750 V for 3 seconds with a 5 mA criterion.

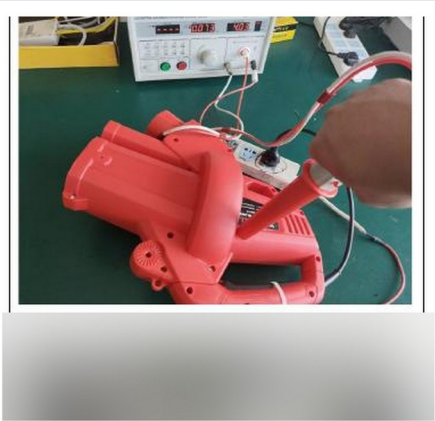

Current DUPOW family image; source customer branding is not shown.

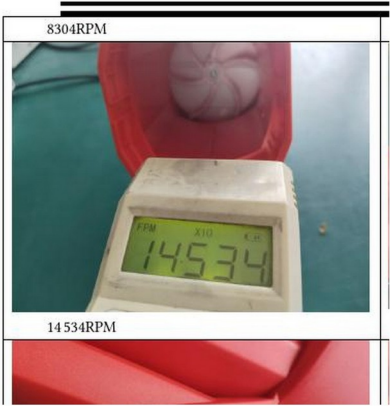

Selected measurement evidence

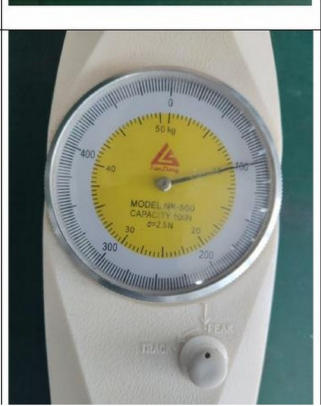

Representative dimensional check.

Electrical test setup; external-brand area obscured.

Recorded rotational-speed reading.

Representative force measurement.

Interpretation

The source reports PASS for the sampled batch. The separate supplier-held TÜV SÜD model-family documents are reviewed on the website as compliance evidence and are not derived from this inspection record.
