

REPRESENTATIVE INTERNAL INSPECTION EVIDENCE

Gasoline Lawn Mower Inspection Photo Record

Public summary • Customer and order identifiers removed

Document status

The supplied source is a photographic inspection record rather than a complete inspection report. It does not state the inspection date, inspector, sample plan, defect classification or a formal acceptance decision. This public version preserves that limitation and does not add a PASS/FAIL conclusion.

Recorded product information

Product	Gasoline lawn mower	Source type	Internal inspection photo record
Engine displacement	173 cc	Maximum power	3.0 kW
Nominal speed	2,800 r/min	Measured no-load speed	2,760 r/min (photo evidence)
Cutting width	530 mm	Cutting height	26–75 mm
Grass-bag capacity	65 L	Lubricating-oil capacity	0.6 L

Photographic inspection coverage

- Packaging arrangement, supplied parts and opening condition.
- Overall assembly, cutting deck, blade area, controls and discharge components.
- Engine service points, carburetor, air filter, fuel system and spark plug.
- Wheel alignment, cutting-height checks and no-load speed measurement.

Representative assembled product view; customer identifiers are not shown.

Packaging and assembly evidence

Packed-product arrangement.

Cutting deck and blade-area inspection.

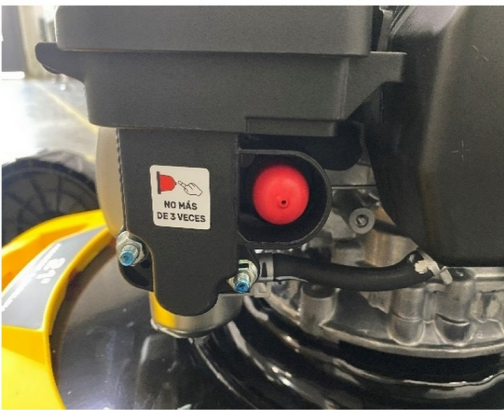

Discharge-closure component.

Side-discharge assembly check.

Engine service-point inspection.

Primer bulb and fuel-system inspection.

Component and measurement evidence

Air-filter housing and instruction label.

Spark-plug reference check.

Wheel-level test detail.

Cutting-height measurement.

No-load speed measurement: 2,760 r/min.

Recommended internal improvement

For future releases, the original inspection form should also record the inspection date, sample quantity, inspection standard, measurable acceptance criteria, defect counts, corrective actions and an authorized final disposition.
